OBJECTIVE

Motivated Computer Science and Data Science graduate seeking a full-time position with a growth-oriented organization, where I can apply my technical skills in programming, data analytics, and web development to deliver measurable business value. Eager to bring strong problem-solving ability, adaptability, and a commitment to continuous learning to contribute meaningfully to the company's success.

TECHNICAL SKILLS

Programming Language: Python

Framework: Django

Database Management: MySQL

Data Analytics: Power BI, Tableau, R

Web Development: HTML, CSS, JavaScript

Framework: Bootstrap

Libraries & Tools: React JS, Pandas, NumPy, MS Excel, Matplotlib, Seaborn

Concepts: Data Analysis, Object-Oriented Programming (OOP), DBMS

Soft Skills: Effective Communication, Team Leading, Time Management

Languages: English, Telugu

EDUCATION

B.Tech – Computer Science and Data Science Engineering

Sri Venkateswara College of Engineering and Technology, Chittoor

2023 – 2026 | **CGPA:** 82%

Intermediate

Sri Chaitanya Junior College, Pileru

2021 – 2022 | **Score:** 57.8%

10th Grade

Z.P. High School, Garnimitta

2019 – 2020 | **GPA:** 93.5%

INTERNSHIPS & CERTIFICATIONS

- Python Certification – L&T EduTech (2023)
- Micro Certification – ServiceNow (2024)
- Crash Course on Core Java – L&T EduTech (2024)
- UI/UX Developer Certification – L&T (2024)
- AI: Transformative Learning – Edunet & Microsoft (2024)

PROJECTS

IPL Cricket Data Analysis (Python)

- Performed comprehensive exploratory data analysis on IPL match and ball-by-ball datasets spanning multiple seasons (2008–2023) using Python (Pandas, NumPy).
- Identified top-performing batsmen, bowlers, and teams using aggregated statistics such as strike rate, economy rate, average, and win percentages.
- Visualized seasonal trends, venue-wise performance, and toss-decision impact using Matplotlib and Seaborn, producing 15+ insightful charts.
- Derived key insights such as powerplay vs. death-over scoring patterns and player performance under pressure (chase vs. defend scenarios).

Student Performance Data Analysis (Python)

- Analyzed a dataset of 1,000+ student records including demographics, study habits, parental education, and exam scores using Python (Pandas, NumPy, Scikit-learn).
- Conducted statistical analysis to determine correlation between key factors (attendance, study time, parental involvement) and academic performance outcomes.
- Built classification models (Logistic Regression, Decision Tree) to predict at-risk students, achieving 84% accuracy.
- Created heatmaps and dashboards using Seaborn and Matplotlib to communicate findings and support early intervention strategies.

Web Development Portfolio Projects (Python Full Stack)

- Designed and developed a personal portfolio website using HTML, CSS, JavaScript, and Django to showcase projects, skills, and resume in a responsive, single-page layout.
- Built a full-stack web application with Django (backend), MySQL (database), and Bootstrap/React JS (frontend), implementing CRUD operations, user authentication, and dynamic templates.
- Analyzed UI/UX patterns from top portfolio sites for clean navigation and responsive design, deployed with version control on GitHub.
